November 21, 2015

MD, HMR Mr.NVS Reddy inspected the extended stretch of about 2.4 km between Hitec City Metro station and Raidurg terminal station along with Cyberabad DCP (Traffic) Mr.Avinash K Mohanty and structural design engineers of L&TMRHL and HMR. Broadly clearing the location of about 70 Metro pillars and the 2 station locations of Cyber Gateway Metro station and Raidurg terminal station, Mr.NVS Reddy has given the following directives to the design engineers of L&TMRHL:

- The Metro pillars shall not reduce the available road carriage way and they shall be located either on the central median or to the edge of the road.
- The pillars of all portal structures shall be designed in such a way that one column is in the central median portion and another column is to the edge of the road.
- The location and position of pillars near Hitec City flyover is changed in such a way that the pillars will now abut the edge of the flyover and do not obstruct traffic flows on the carriage way.
- L&TMRHL shall take special care in designing Metro foundations and pillars keeping high standards of road safety in mind.
- The design of Raidurg Metro station and Metro pillars from Raidurg station to Cyber Gateway station shall also facilitate construction of the proposed underpass and flyover planned by GHMC at Mindspace Jn.

MD, HMR advised the engineers of HMR and L&TMRHL to mark the available Right of Way (RoW) on either side of the stretch from Cyber towers to Raheja Mindspace IT park. He also advised them to remove the encroachments and widen the carriage way. Since this is a high density traffic stretch, he advised L&TMRHL and HMR engineers to provide service roads on either side for better traffic management.

Mr. Reddy also inspected Parking and Circulation (P&C) area near NIFT which is being constructed as a part of Transit Oriented Development (TOD) and enquired about amenities and facilities that are being planned in this P&C like skywalks, etc., from the station to Parking and Circulation area.

Chief Engineer, HMR Mr.Md.Ziauddin and other senior engineers and officers from HMR and L&TMRHL were also present during the inspection.
