

IIT-M ALUMNI TALK ON SUSTAINABLE, GREEN CITIES

DC CORRESPONDENT

HYDERABAD, JULY 26

IIT Madras alumni and faculty organised a meet in Hyderabad on the theme "Sustainable and Green Cities." Speaking as the chief guest, Hyderabad Metro Rail managing director N.V.S. Reddy emphasised that as urbanisation accelerates across India, cities are coming under increasing pressure.

"To build environmentally resilient and long-lasting urban spaces, there must be a shared responsibility in delivering well-planned infrastructure and essential services," Reddy said.

He highlighted that public transport, eco-friendly waste management, protection of water bodies, rainwater harvesting, flood control measures, and affordable housing are key components of a sustainable urban future.

Citing the success of the Hyderabad Metro Rail, Reddy invited greater participation from IITs in upcoming metro expansion projects. He also expressed a strong interest in integrating innovative ideas from academia into future metro developments.
